

Friday, November 30th, 2018

Dear Parents,

On Friday, November 30th, DiscoverE will be coming to Madonna School to present a workshop for all Grade 3s called *Structures and Design: Popsicle Stick Bridge Challenge*. DiscoverE is a student-delivered initiative of the University of Alberta Faculty of Engineering that focuses on fun, engaging, and educational classroom workshops.

This workshop highlights the pros and cons of various building materials, strong shapes, and the design and purpose of different types of bridges. In this workshop, students will have the opportunity to work together to design and create popsicle stick bridges. This workshop corresponds with our current science unit, Testing and Building with a Variety of Materials.

3L will participate in the workshop from 8:45-10:00 a.m.

3S will participate in the workshop from 10:30-11:45 a.m.

The cost for this workshop is \$5.60 and can be paid online through PowerSchool. Please note that this amount is based on full participation. The amount may and will change depending on the number of students participating.

This must be paid prior to the workshop in order for your child to participate.

Sincerely,

Mrs. Lampka
Miss Suddaby
