COVID-19 INFORMATION

COVID-19 ALBERTA HEALTH DAILY CHECKLIST (FOR CHILDREN UNDER 18)

Overview

This checklist applies for all children, as well as all students who attend kindergarten through Grade 12, including high school students over 18. Children should be screened every day by completing this checklist before going to school, childcare or other activities. Children may need a parent or guardian to assist them to complete this screening tool.

reen	ing Questions for Children under 18:				
1.	Has the child traveled outside Canada in the last 14 days?	YES	NO		
lf ti	ne child answered "YES":				
	he child is required to quarantine for 14 days from the last day of exposure.				
	the child develops any symptoms, use the <u>AHS Online Assessment Tool</u> or call Health Link 8	311 to			
	letermine if testing is recommended.				
lf ti	ne child answered "NO", proceed to question 2.		1		
2.	Has the child had close contact with a case ¹ of COVID-19 in the last 14 days?	YES	NO		
	Face-to-face contact within 2 metres for 15 minutes or longer or direct physical contact				
	such as hugging				
	ne child answered "YES":				
• 1	he child is required to quarantine for 14 days from the last day of exposure, except:				
	 Previously tested positive for COVID-19 in last 90 days before exposure: 				
	 No quarantine required. Monitor for symptoms for 14 days. 				
	• Fully immunized ² against COVID-19:				
	 No quarantine required. Monitor for symptoms for 14 days. 				
	Partially immunized ³ against COVID-19:				
	• Quarantine for 10 days. If tested on day 7 or later after exposure, quarantine ends after	er receivi	ng a		
	negative test result.				
	the child answered "NO" or if they have symptoms, proceed to question 3.				
3.	Does the child have any new onset (or worsening) of the following core symptoms: Fever	YES	NO		
		TES	NU		
	Temperature of 38 degrees Celsius or higher Cough	YES	NO		
	Continuous, more than usual, not related to other known causes or conditions such as	TES	NO		
	asthma				
	Shortness of breath	YES	NO		
	Shorthess of breath				
	Continuous, out of breath, unable to breathe deeply, not related to other known causes		No		
	Continuous, out of breath, unable to breathe deeply, not related to other known causes or conditions such as asthma				
	Continuous, out of breath, unable to breathe deeply, not related to other known causes or conditions such as asthma Loss of sense of smell or taste	YES	NO		
If th	Continuous, out of breath, unable to breathe deeply, not related to other known causes or conditions such as asthma Loss of sense of smell or taste Not related to other known causes or conditions like allergies or neurological disorders				
	Continuous, out of breath, unable to breathe deeply, not related to other known causes or conditions such as asthma Loss of sense of smell or taste Not related to other known causes or conditions like allergies or neurological disorders the child answered "YES" to any symptom in question 3:	YES	NO		
lf ti •	Continuous, out of breath, unable to breathe deeply, not related to other known causes or conditions such as asthma Loss of sense of smell or taste Not related to other known causes or conditions like allergies or neurological disorders the child answered "YES" to any symptom in question 3: The child is to isolate for 10 days from onset of symptoms OR receive a negative COVID-19	YES	NO		
	Continuous, out of breath, unable to breathe deeply, not related to other known causes or conditions such as asthma Loss of sense of smell or taste Not related to other known causes or conditions like allergies or neurological disorders the child answered "YES" to any symptom in question 3: The child is to isolate for 10 days from onset of symptoms OR receive a negative COVID-19 better before returning to activities	YES	NO feel

	Unexplained loss of appetite Not related to other known causes or conditions, such as anxiety or medication	YES YES	NO NO NO
	Muscle/joint aches Not related to other known causes or conditions, such as arthritis or injury		
	Headache Not related to other known causes or conditions, such as tension-type headaches or chronic migraines	YES	
	Conjunctivitis (commonly known as pink eye)	YES	NO
• K	child answered "YES" to ONE symptom in question 4: eep your child home and monitor for 24 hours.		
е	their symptom is improving after 24 hours, they can return to school and activities when they nough to go. Testing is not necessary.		
<u>A</u>	the symptom does not improve or worsens after 24 hours (or if additional symptoms emerge <u>HS Online Assessment Tool</u> or call Health Link 811 to check if testing is recommended. child answered "YES" to TWO OR MORE symptoms in guestion 4:	e), use t	he
	eep your child home.		
	se the AHS Online Assessment Tool or call Health Link 811 to determine if testing is recommer	habe	

• Use the <u>AHS Online Assessment Tool</u> or call Health Link 811 to determine if testing is recommended.

• Your child can return to school and activities once their symptoms go away as long as it has been at least 24 hours since their symptoms started.

If the child answered "NO" to all questions:

• Your child may attend school, childcare and/or other activities.

Please note: If your child is experiencing any symptoms from the lists above, do not bring them to visit a continuing care or acute care facility for 10 days from when symptoms started or until symptoms resolve (whichever is longer), unless they receive a negative COVID-19 test result and feel better.

NOTE: Individuals who are profoundly immunocompromised and fully immunized should follow quarantine protocol for partiallyimmunized individuals; those who are partially immunized should follow the protocol for those who have not been immunized. Profoundly immunocompromised persons should always consult with their primary care provider if exposed
